

12 March 2022

The Hague or Zoetermeer

EGCH

organizes Helping Babies Breathe, 2nd edition, provider and facilitator course.

Helping Babies Breathe is an initiative of the American Academy of Pediatrics (AAP), developed in collaboration with WHO, and supported by many major global health organizations. It is an evidence based educational training program to reduce neonatal mortality in resource limited environments (RLEs). It focuses on teaching birth attendants neonatal resuscitations techniques, and has been shown to reduce neonatal mortality by up to 47%. HBB has been implemented in more than 75 countries, targeting the Sustainable Development Goal-countries.

EGCH again offers you the opportunity to master the HBB2 method by this very practical teaching, with lots of scenarios, background information and focus on educational techniques. It prepares you for organizing and facilitating your own trainings in the RLEs. This time Essential Care for Every Baby (ECEB) will also be addressed.

This one day training will be facilitated by an AAP certified trainer.

We need 12 participants. Accreditation has been requested for NVTG, NVK.

Costs: Training fee, including lunch and tea per person: 200,00 euro

For more information or registration for the workshop, please email
