

# HBB facilitator training in The Netherlands

EGCH for the 5th time organizes this one day training to enable you to practice and teach the concepts of Helping Babies Breathe (HBB) in your future resource limited working environment.

**Helping Babies Breathe** is an initiative of the American Academy of Pediatrics (AAP), developed in collaboration with WHO, and supported by many major global health organizations. It is an evidence based educational training program to reduce neonatal mortality in resource limited environments. It focuses on teaching birth attendants neonatal resuscitations techniques, and has been shown to reduce neonatal mortality by up to 47%. HBB has been implemented in more than 75 countries, targeting the Sustainable Development Goal-countries.

Your course leader is Jeanine Punt, pediatrician, AIGT, Master Trainer HBB. She has facilitated many trainings in HBB in NL and abroad.

WHEN: sat 12-12-2020 and/or sat 19-12-2020
